

Dynamic is the leading enterprise software and solutions company for Health Plans managing Medicare Advantage lines of business.

As the Government regulated healthcare market evolves, Plans must leverage their core competencies in order to remain competitive, while remaining compliant and providing the highest level of service to their members.

Our extensive industry experience, coupled with a proven track record, makes Dynamic the premier solutions provider for Health Plans looking for a partner to help fill their program gaps. Dynamic focuses on the products, technology and solutions for clients so they in turn can focus on doing what they do best – providing their members with quality care.

Enrollment

Reduce costs and maintain compliance by automating member eligibility verification using Dynamic's Enrollment Module, which utilizes the CMS-endorsed and recommended BEQ process. The module supports automated letter generation, optimizes adjudication rates (98% average) and provides TRR processing.

Premium Billing

Dynamic's Premium Billing Module allows you to improve compliance, member satisfaction, and cash flow. The module accurately tracks member dues calculations, premium payments (SSA, Direct Deposit, Lock box, Manual Payments), and overdue payments.

Reconciliation

Identify data and process issues early using Dynamic's Reconciliation Module. Easily locate and track member, special status, and payment discrepancies between your MMR and internal data.

Risk Adjustment

Plans must collect, validate and submit diagnostic data to CMS to receive accurate premium payments. Dynamic's Risk Adjustment Module allows Plans to process and submit data, identify missing and miscoded codes, and manage their retrospective and prospective programs.

Dynamic has built a strategy around the development of focused software combined with unique, scalable, and flexible delivery models. In addition, we have established strategic partnerships allowing us to deliver synergistic and integrated solutions. This provides customers the opportunity to work with a consortium of subject matter experts dedicated to solving the complex compliance and administrative challenges of the Medicare, Medicaid, and Exchange markets.

Kathy Feeny
President & CEO

Revenue Optimization

Dynamic's risk adjustment program oversight services creates and/or assesses Health Plan risk adjustment strategies and provides Plans with objective, third-party insights into their operations. These revenue optimization services include a comprehensive inspection of a Health Plan's risk adjustment program and strategy.

PDE Management

Plans may delegate the PDE submission process to PBMs, but responsibility for accuracy remains with the Plan. Dynamic's PDE Management Module allows Health Plans to monitor the PDE data submission process and verify that accurate data is sent and stored. Additionally, Plans can easily create internal views of the cost and payment calculations, and know that all information reported in the PDE data is correct.

Professional Services

We recognize that Health Plan success depends on a combination of superior software and professional services. Our team's expertise in Medicare Plan and Pharmacy Benefit Management operations allows us to partner with customers to deliver the solutions they need when they need them.
