

Dynamic Healthcare Systems is the premier business partner for the management and administration of Government-sponsored Health Plans.

Our extensive industry experience is why Dynamic Healthcare Systems is chosen as the “Partner of Choice” by those participating in the complex compliance requirements and regulations of Medicare, Medicaid, and the Exchange Marketplace.

Our risk adjustment oversight program is designed to provide clients with a comprehensive view of their program gaps related to data governance, revenue management forecasting, and suspect targeting.

Risk Adjustment Program Oversight Services:

REVENUE MANAGEMENT AND FORECASTING

Government-sponsored Health Plans understand that the success of healthcare reform is dependent on the science of risk adjustment.

Accurate payment methodologies are critical to creating an environment where Health Plans compete on the basis of efficiency and quality of care. This competitive environment is necessary to reduce unsustainable growth in the cost of care, and risk adjustment is central to it.

Those Health Plans leveraging risk adjustment programs and systems must audit their operations to ensure and enforce coding “integrity” – that is consistent use of diagnosis and procedure codes to elevate member care.

Government-sponsored programs best practices include a rigorous risk adjustment oversight strategy that involves continuous data evaluation, advanced suspect targeting algorithms, and payment model optimization methods.

Dynamic’s Risk Adjustment Program Management and Assessment Services Include:

- V.22 Financial Modeling and Revenue Forecasting
- CMS Overpayment Inspection
- Suspect Targeting
- Data Governance (RAPS to EDS Parallel Insight)
- Revenue Optimization

PROFESSIONAL & BUSINESS SERVICES

Dynamic is the leading enterprise software and solutions company for Health Plans managing Medicare Advantage (MA) lines of business.

In addition to our Voyager software, we offer several programs which allow Plans to leverage the expertise of our experienced team of healthcare professionals and are designed to provide clients with a deep understanding of their program gaps, as well as a clear plan to reach their desired goals. Areas of expertise include Risk Adjustment, Reconciliation, Compliance and Quality Measures.

V.22 Financial Modeling and Revenue Forecasting

The current CMS-HCC risk adjustment model has been revised. In an attempt to mitigate risk associated with the changes resulting from the migration to a new model, CMS leveraged blended risk scores in 2014 and it is anticipated that the new HCC V.22 model will be fully transitioned in 2016.

CMS's updated risk adjustment model implementation will have significant impacts to Health Plan's revenue stream and forecasting efforts.

Dynamic's financial modeling and revenue forecasting services include:

- HCC risk adjustment evaluation leveraging current CMS-HCC blended rate
- HCC risk adjustment revenue forecasting according to adoption of 100% of the new V.22 model
- Detailed comparative analysis to identify drivers of member risk score changes
- Consultative executive summary indicating overall revenue implications
- Recommendations to organizations for forecast optimization

CMS Overpayment Inspection

With the onset of the Affordable Care Act (ACA), CMS instituted an overpayment mandate requiring Government-sponsored Health Plans to support additional compliance oversight in their payment processing procedures.

CMS is currently working to recoup approximately \$72 billion in overpayments. CMS released a memo opening the window for Health Plans to submit deletion transactions for their risk score adjustments. This new regulatory requirement to return Medicare overpayments is causing exceptional operational challenges for Health Plans.

Dynamic's CMS overpayment inspection services include:

- Identification of potential overpayment outliers through:
 - Reverse suspecting for accurate documentation
 - Evaluation of additional data sources
- Detailed assessments including forecasted financial implication
- Preparation and transmission of proposed "DELETE" transactions to CMS

Leading Healthcare Partnership

Dynamic Healthcare Systems, the leading Government healthcare solutions partner, understands the complexity and rapid adaptation Health Plans need to effectively manage unprecedented volumes of data and the ever-changing regulatory and compliance requirements associated with achieving success.

Dynamic's comprehensive solutions and services portfolio include:

- End-to-End Government Health Plan Administration
- Productivity Measurement and Oversight
- Revenue Optimization and Protection
- Risk Adjustment Management
- Risk Mitigation Intelligence
- Encounter Management
- Professional Services
